

# LUXEON HL4Z

Superior flux density and flexibility for precision light controls.

LUXEON HL4Z is a specially designed high-power un-domed emitter suitable for outdoor and industrial applications like streetlights and high bay luminaires.

LUXEON HL4Z provides maximum lumen outputs, and overall system efficacy in an industry standard 3535 package with 3-stripe footprint. With plenty of light coming from a small LES device and flexibility of optical control, it is perfect for fixture designs need high flux density and precision light controls.

## FEATURES AND BENEFITS

Highest lumens per emitter on smallest LES

Ability to drive at high maximum current

Industry standard 3535 package with 3-stripe footprint, suitable for existing designs with higher efficacy requirements

Special materials selection enables long lasting reliability in harsh environments

## PRIMARY APPLICATIONS

Outdoor High Mast

Floodlights

Spotlights

High Bay

Low Bay

Torch

# General Product Information

## Product Test Conditions

LUXEON HL4Z LEDs are tested and binned with a DC drive current of 1400mA, at a junction temperature,  $T_j$ , of 85°C.

## Part Number Nomenclature

Part numbers for LUXEON HL4Z follow the convention below:

L 1 H Z – **A A B B** 4 **C** z z z z z z z

Where:

- A A** – can be any alphanumeric character that designates nominal ANSI CCT (for example, 30=3000K, 40=4000K, 50=5000K, 57=5700K, 65=6500K)
- B B** – can be any alphanumeric character that designates minimum CRI (for example, 70=70CRI, 80=80CRI, 90=90CRI)
- C** – can be alphanumeric character that designates performance options (for example, 0=Standard full distribution)
- zzzzzz – can be any alphanumeric character that can be used to designate customer-specific options

Therefore, the following part number is used for a LUXEON HL4Z 4000K 70CRI LED:

L 1 H Z – **4 0 7 0** 4 **0** 0 0 0 0 0 0

## Lumen Maintenance

Please contact your local Sales Representative or Lumileds Technical Solutions Manager for more information about the long-term performance of this product.

## Environmental Compliance

Lumileds LLC is committed to providing environmentally friendly products to the solid-state lighting market. LUXEON HL4Z is compliant to the European Union directives on the restriction of hazardous substances in electronic equipment, namely the RoHS Directive 2011/65/EU including amendments 2015/863/EU & 2017/2102/EU and REACH Regulation (EC) 1907/2006. Lumileds LLC will not intentionally add the following restricted materials to its products: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE).

Notes for Table 1:  
1. Lumileds maintains a tolerance of ±2 on CRI.  
2. Lumileds maintains a tester tolerance of ±6.5% on luminous flux measurements.  
3. Lumileds maintains a tester tolerance of ±6.5 on R9 measurements.

# Absolute Maximum Ratings

Table 4. Absolute maximum ratings for LUXEON HL4Z.

PARAMETER	MAXIMUM PERFORMANCE	
DC Forward Current <sup>[1, 2, 5]</sup>	3A	3.5A
Peak Pulsed Forward Current <sup>[1, 3]</sup>	3A	3.5A
LED Junction Temperature <sup>[1]</sup> (DC & Pulse)	150°C	135°C
ESD Sensitivity (ANSI/ESDA/JEDEC JS-001-2012)	Class 3B	
Operating Case Temperature <sup>[1]</sup>	-40°C to 135°C	
LED Storage Temperature	-40°C to 135°C	
Soldering Temperature	JEDEC 020c 260°C	
Allowable Reflow Cycles	3	
Reverse Voltage <sup>[4]</sup> (V <sub>reverse</sub> )	LUXEON LEDs are not designed to be driven in reverse bias	

Notes for Table 4:

1. Proper current derating must be observed to maintain the junction temperature below the maximum allowable junction temperature.
2. Residual periodic variations due to power conversion from alternating current (AC) to direct current (DC), also called "ripple," with frequencies  $\geq 100\text{Hz}$  and amplitude  $\leq 15\%$  of the maximum allowable DC forward current are acceptable, assuming the average current throughout each cycle does not exceed the maximum allowable DC forward current at the corresponding maximum junction temperature.
3. Pulsed operation with a peak drive current equal to the stated peak pulsed forward current is acceptable if the pulse on-time is  $\leq 5\text{ms}$  per cycle and the duty cycle is  $\leq 50\%$ .
4. Transient reverse voltages and surge currents due to electrical switching or supply interruptions are acceptable if these events do not last for more than 10ms, the amplitude of the reverse voltage does not exceed 5V and the reverse current is less than 220uA.
5. For torch application with portable battery source, maximum surge transient current during the initial turn-on is 3.5A for 180ms and thereafter not to exceed DC maximum rating current and LED junction temperature.

# Product Bin and Labeling Definitions

## Decoding Product Bin Labeling

In the manufacturing of semiconductor products, there are variations in performance around the average values given in the technical datasheet. For this reason, Lumileds bins LED components for luminous flux or radiometric power, color point, peak or dominant wavelength and forward voltage.

LUXEON HL4Z LEDs are labeled using a 4-digit alphanumeric CAT code following the format below:

**A B C D**

Where:

- A** – designates luminous flux bin (example: T=480 to 510 lm, B=720 to 750 lm)
- B** – designates color bin (example: 1=6500K, 2=5700K, 3=5000K, 5=4000K, 7=3000K)
- C** – designates color space (example: 5/A/B/C/D=5-step MacAdam ellipse, 3=3-step MacAdam ellipse)
- D** – designates forward voltage bin (example: V= 2.70 to 2.90V, W=2.90 to 3.10V)

Therefore, a LUXEON HL4Z 4000K 70CRI with a lumen range of 660 to 690 lm, color bin of 55 and a forward voltage range of 2.70 to 2.90V has the following CAT code:

**Z 5 5 V**

# Luminous Flux Bins

Table 5 lists the standard luminous flux bins for LUXEON HL4Z emitters. Although several bins are outlined, product availability in a particular bin varies by production run and by product performance. Not all bins are available in all CCTs.

## About Lumileds

Companies developing automotive, mobile, IoT and illumination lighting applications need a partner who can collaborate with them to push the boundaries of light. With over 100 years of inventions and industry firsts, Lumileds is a global lighting solutions company that helps customers around the world deliver differentiated solutions to gain and maintain a competitive edge. As the inventor of Xenon technology, a pioneer in halogen lighting and the leader in high performance LEDs, Lumileds builds innovation, quality and reliability into its technology, products and every customer engagement. Together with its customers, Lumileds is making the world better, safer, more beautiful—with light.
